

Scalability & Team Involvement Documentation

1. Scalability & Future Plan

Current System Limitations

S.No	Limitation	Impact	Priority
1	Manual model retraining	Latency in adapting to new data	Medium
2	Single-server deployment	Bottlenecks during extreme traffic	High
3	Data storage growth	Long-term database performance issues	Low

Scalability Plan

S.No	Aspect	Current State	Proposed Solution
1	User Load	Vertical scaling	Horizontal scaling with Kubernetes
2	Data Storage	PostgreSQL local	Cloud-based RDS with partitioning
3	Performance	Gunicorn workers	Distributed Task Queue (Celery)

Future Roadmap

Phase	Feature / Enhancement	Timeline	Impact
Phase 2	Automated Retraining	Q3 2026	Better Model Accuracy
Phase 3	Multi-region Deployment	Q4 2026	Global Availability

2. Team Involvement in Demonstration

S.No	Member	Role	Section Presented	Contribution
1	Member 1	Team Lead	Introduction & Demo	Led design & development

Team Coordination Notes

Aspect	Details
Team Leader	Member 1
Overall Rating	5/5
Issues	None
