

Date	15 March 2026
Team ID	XXXXXX
Project Name	Credit Card Approval Prediction
Maximum Marks	2 Marks

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1: Application	Stage 2: Prediction Processing	Stage 3: Result & Explanation
Actions What does the customer do?	Fills out the online credit card application form with their demographic and alternative financial details.	Submits the form and waits for the system to process the data and run the ML prediction.	Reviews the approval decision and reads the AI-generated explanation of the result.
Touchpoint What part of the service do they interact with?	Web-based dashboard interface.	Automated backend preprocessing pipeline and ML model.	Result dashboard with XAI (Explainable AI) visualizations.
Customer Thought What is the customer thinking?	"I hope this bank considers more than just my limited traditional credit score."	"Is the system taking too long? Will I get unfairly rejected again?"	"Finally! I understand exactly why I was approved/rejected based on my real financial data."

Phase of Journey	Stage 1: Application	Stage 2: Prediction Processing	Stage 3: Result & Explanation
Customer Feeling What is the customer feeling?	Anxious but hopeful.	Nervous anticipation.	Relieved, empowered, and informed.
Process Ownership Who is in the lead on this?	UI/UX Designer & Frontend Developer.	Data Engineer & ML Engineer.	Backend Developer & ML Explainability Engineer.
Opportunities How can we improve this stage?	Make the form intuitive with tooltips explaining why alternative data is collected.	Optimize the pipeline for real-time speed to reduce waiting anxiety. Display a progress bar.	Provide actionable tips for financial improvement if rejected, or immediate onboarding steps if approved.
